

ABSTRACT OF THE DISCLOSURE

An apparatus for covering a glucose meter is described, wherein the glucose meter has a front surface opposed to a back surface, and an edge surface connecting the front surface to the back surface. The apparatus comprises a frame adapted to receive the glucose meter and at least one attachment member connected with the frame. The frame is adapted to surround a substantial portion of the edge surface and form an opening for viewing at least a portion of the front surface of the glucose meter. The attachment member is adapted to removably connect the frame with the glucose meter.
